I	14x	J-pegs 30 cm length
J	6x	T-pegs 40 cm length
K	1x	Repair kit
L	1x	Hammer
M	1x	Assembly Manual

**1**

Place the package at the exact place where the tent will be erected.

**2**

(i) Unpack the package and take aside the bags with poles and accessories. (ii) Remove the bag. (iii) Unroll the bundle.

**3**

Firmly join the colour-coded sections together.

**4**

Slide the colour-coded poles through their respective sleeves.

**5**

Push the tent upwards from inside at the middle while inserting grey poles and orange poles into the tips of the base plates.

**6**

Slide the blue front and back arches through the sleeves and insert the tips of the poles into the base plates.

7

Wrap all Velcro straps around the respective poles.

8

Secure the **green** pole to the middle of the **blue** pole using the clip on both sides of the tent.

9

Pull out the corners to tension the groundsheet. Secure base plates with J-pegs (I).

10

Secure the base of the tent with J-pegs.

11

If possible, dig a trench and bury and fill the mudflap with stones, dirt and rocks.

12

1: Use large T-pegs (J) to secure the four main corner ropes.  
2: Use J-pegs (I) to secure the other ropes.

13

1: Place the shade cover (H) on top of the tent and close Velcro straps to position shade net.  
2: Tie the remaining guy ropes to the pegs.

14

Attach the shade net to the **blue** poles in the tent using Velcro loops.

Repair manual

1 2 x Needles	2 Thread	3 3 x Repair Sleeve	4 Duct Tape	5 PE Tape	6 Mesh
