

Winter Liner

UNICEF standard

› Key features

- » Insulating Winter liner with integrated groundsheet, suspended from tent frame
- » Designed to create a warm, comfortable, stress-free environment during winter conditions, especially focussing on child-friendly spaces, medical treatment and office/accommodation
- » The insulation flooring tiles add to the comfort. The insulation flooring tiles can be placed on top of the hard flooring tiles in case the underground is too soft
- » Highly breathable materials with added ventilation grates in gables and along the top of the side walls
- » The winter liner has large windows in the sidewalls to allow daylight in during daytime. The windows are made of transparent PVC and have a cover flap on the inside to keep warmth in at night
- » The right back corner of the winter liner is prepared to place a burning stove for heating. Heat protecting fibrocement tiles, wall panels and chimney sleeve are included
- » The gables in front and back are fitted with inlet ducts for externally placed heating or air conditioning units. In the top left and right corners are inlets for power cables
- » In front of the Winter liner is a small vestibule to be used as storage, changing area or waiting room
- » Rot and mildew proof, easy to clean and disinfect, resistant to commonly used disinfectants and detergents
- » Heavy-duty durable block zipper to assure long useability
- » Environmentally friendly: low energy production process, fully recyclable, safely disposable by burning or burying when recycling is not possible

› Dimensions

Total size	21, 42, 60 m ²
Floor size	5.8 x 3.5 / 5.8 x 7 / 5.8 x 10 m (±2%)
Central height outer tent	2.60 m (±2%)
Wall height outer tent	2.00 m (±2%)
